

Purvansh B. Vaikunthe

Software Test Analyst

Seeking a position to have a growth-oriented and challenging career where I Can make a significant contribution to the success of the organization and enhance my experience through continuous learning and teamwork.

Profile Summary

- **5 Years** of experience in Software Application Testing - **Manual Testing** and **Automation Testing (Selenium WebDriver with Java, Cypress)**.
- Well acquainted with the **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**.
- Proficient in writing Test Cases and executing same by using **Test case design techniques**.
- Detecting **bugs** and classifying them based on **severity and priority**.
- Good in Test Execution Process, **Defect Life Cycle**, Defect raising and monitoring, Worked closely with the development team.
- Have performed various types of testing like **Functional Testing, System Testing, Non-functional Testing, Sanity Testing, Re-testing, Regression Testing, Ad-hoc Testing, Exploratory Testing, Compatibility, API Testing**.
- Expertise in bug tracking process using bug tracking tool - **RALLY**.
- Implemented **Agile** Methodology Process in the project.
- Exposure to **API** testing by using **Postman**.
- Used MySQL as a frontend database utility tool to perform database testing.
- **Automation Testing (Selenium WebDriver with JAVA)** and **Cypress** using **JavaScript and Cucumber**.
- Design and Develop Test Scripts as per requirement and then automate the scripts.
- Good Understanding of **OOPs Concepts, Array, Collections** and **String** in JAVA.
- Experience in creating **POM** and **Test Classes** for the Framework, using **TestNG and Cucumber framework** assertion and annotation for the development of Test classes.
- Experience in executing the test scripts in parallel for **Chrome, Firefox and Edge**.
- Test script execution, debugging, and fixing the Automation issues.
- Good Understanding of **Data Driven, Hybrid framework, TestNG, Cucumber, Git** for the repository Management.

PROFESSIONAL EXPERIENCE

- | | |
|-------------------------------|------------------------------|
| Software Test Analyst | January 2022 – Present |
| • FIS Global, Pune, MH | |
| Software Test Engineer | November 2018 – January 2022 |
| • O2 Soft Solutions, Pune, MH | |

CERTIFICATION

- AWS Certified Solutions Architect – Associate from Amazon Web Services (AWS) (Issue Date: Jul 31, 2023, Expiration Date: Jul 31, 2026) Certificate No.– YTVLB4K242BEQ9SN

SKILLS

Key Skills:

- Manual Testing
- Automation Testing
- Performance Testing

Data Base:

- MySQL

Programming Language:

- Java
- JavaScript

Performance Testing:

- JMeter

Automation Testing Tools:

- Selenium WebDriver
- Cypress
- Maven
- TestNG
- Cucumber

Product Management:

- Agile Methodology
- Rally
- Git-Hub and Git-Lab

EDUCATION

- Master of Technology in **Thermal Power Engineering (Mechanical)** - **Amravati University** Maharashtra - CGPA: 9.11
- Bachelor of Engineering in **Mechanical Engineering** – **Nagpur University** Maharashtra – CGPA: 8.91

Language Known

- English
- Hindi
- Marathi

PROJECT DETAILS

Project - 1

Domain Name	: Investment Banking
Duration	: Nov-2018 – Jan-2022
Methodology	: Manual Testing and Automation Testing

Roles and Responsibilities:

- Understanding Functional Requirements & analysis.
- Test Case Preparation and Test Execution.
- Defect Reporting, Tracking, and Retesting.
- Collaborate with Team members, technical discussions, and issue resolution.
- Working with Agile Methodology.
- Participating in Daily stand meetings.
- Extensively used selenium WebDriver with TestNG framework.
- Developing POM classes and Test classes and reviewing the Automation script.
- Preparation of reports case Execution, Defects by Severity.
- Reporting Progress of Daily status to the TL.
- Client Communications as required.

Project - 2

Domain Name	: Retirement
Duration	: Jan 2022 – Till Date
Methodology	: Manual Testing, Automation Testing, Performance Testing, API Testing

Roles and Responsibilities:

- Understand and analyze the requirements and functionality of the application.
- Created test scenarios and test cases and reviewed test cases and execution of same.
- Managed design, development, and documentation of test cases for manual testing.
- Identified defects, prepared defect reports Tracking, and Retesting.
- Handling Both Manual & Automation Testing.
- Identifying test cases for Automation.
- Build and enhanced automated test framework using Cypress and Page Object Model Concepts by integrating Cucumber Framework.
- Developing POM classes and Test classes and reviewing the Automation script.
- Working with Rally for logging defects and test case management
- Validation of the response received through the POSTMAN.
- Attending daily stand-up meetings and other scrum ceremonies like Sprint Refinement, Sprint Retrospective, Sprint Demo and Sprint Planning.
